

Welcome

Mystic

An initial effort in academic metrics, impact, and community

Emi Simpson
Full Stack Developer

Stephen Jacobs
Director, Open@RIT

Agenda

Introductions	5m
Why Mystic	5m
See It In Action	10m
Wrap Up / Q&A	10m

Why an Open Programs Office?

What Kind of Research?

What makes an Academic OSPO different

Research & Scholarship 1st
Profit 2nd (ideally)

Staff, Student, Faculty
A diverse environment

Why?

**Evaluation &
Tenure Promotion**

**More Pressure
To Change**

Faculty are

(somewhat)

**Disincentivized From Doing
Open Work**

why

MYSTIC

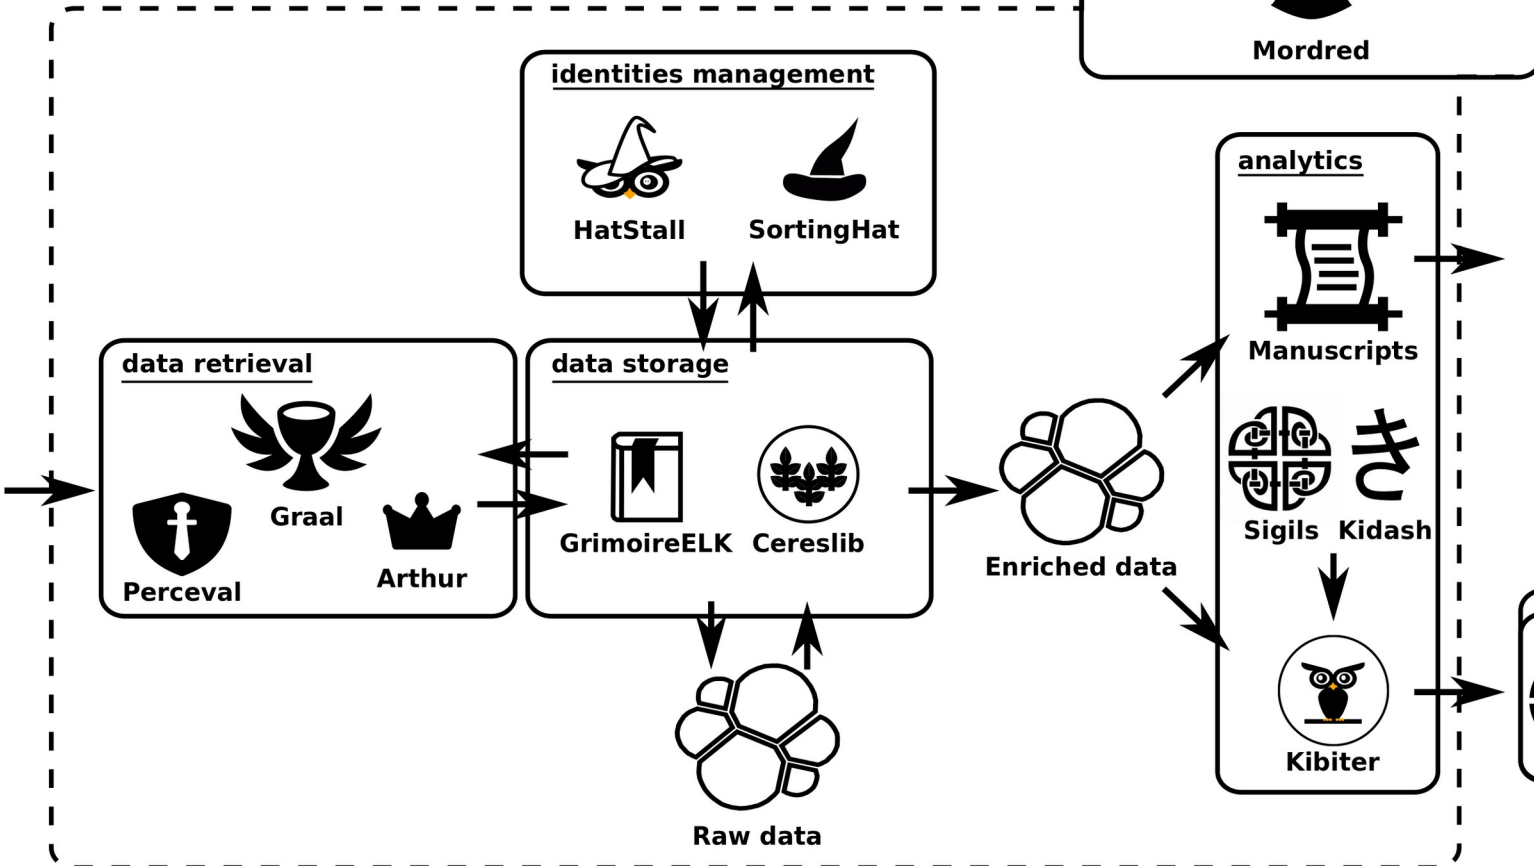

**We have
no metrics
for the scale
of open source
in the university**

**existing
groups lack
access to
resources**

**open source
projects rarely
communicate**

Data sources

orchestration

Mordred

analytics

Manuscripts

Sigils Kidash

Kibiter

**Difficult
to understand**

**No access
controls**

**Components
are very disparate**

Mystic

Mystic is your hub for open source everything. Community is central to every open source project, whether it's open code, open science, or anything else in the open source ecosystem. Mystic is your tool to build that community. Anyone in the community can submit what they've been working on and immediately have access to a homepage for their project, CHAOSS community/software health metrics, and visibility within the community - letting them do amazing work as part of a thriving community.
